

Week - 1

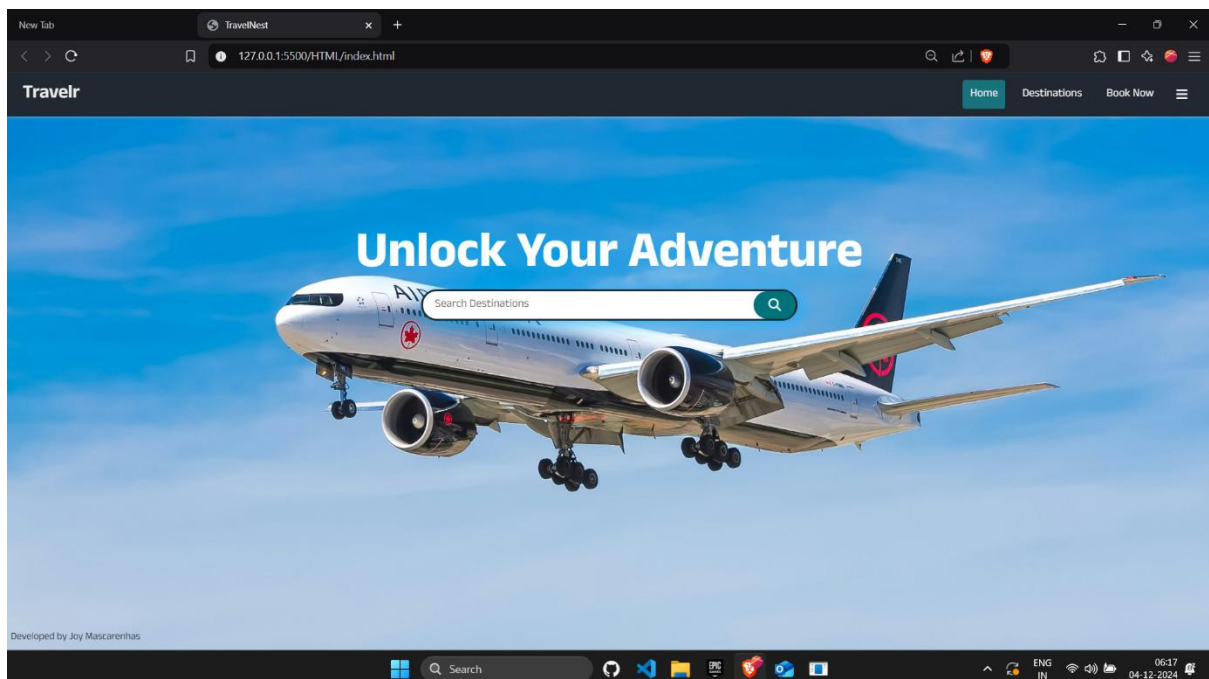

Design Approach:

For the Travel Booking website (Travelr), I aimed for a modern and a user-friendly design. The layout includes a header, a collapsible side menu, and a hero image as the background. I focused on responsiveness, ensuring the design works on both desktop and mobile. I used CSS grid for the search form on the search page to make it responsive.

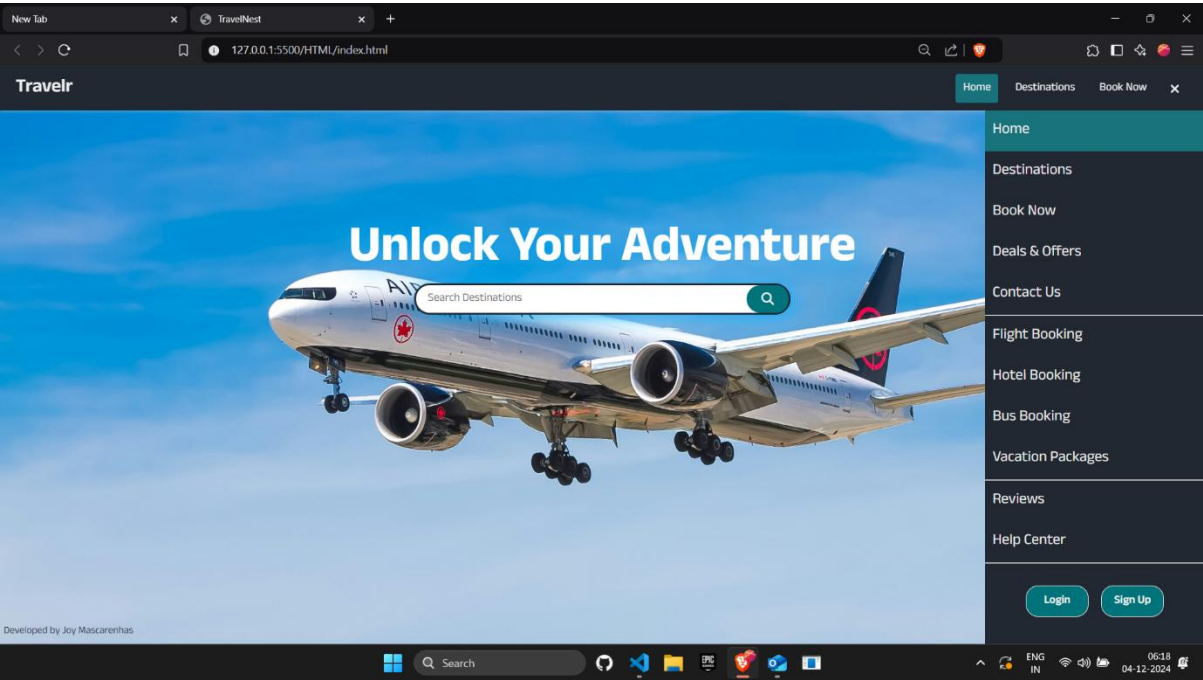

Challenges:

The challenge I faced was ensuring the side menu and search form worked correctly in mobile. I used CSS animations to create a sliding effect for the side menu, and JavaScript to handle the opening and closing of the menu. I also used GSAP library for other animations. Mainly the challenge was to make the website responsive across different screen sizes.

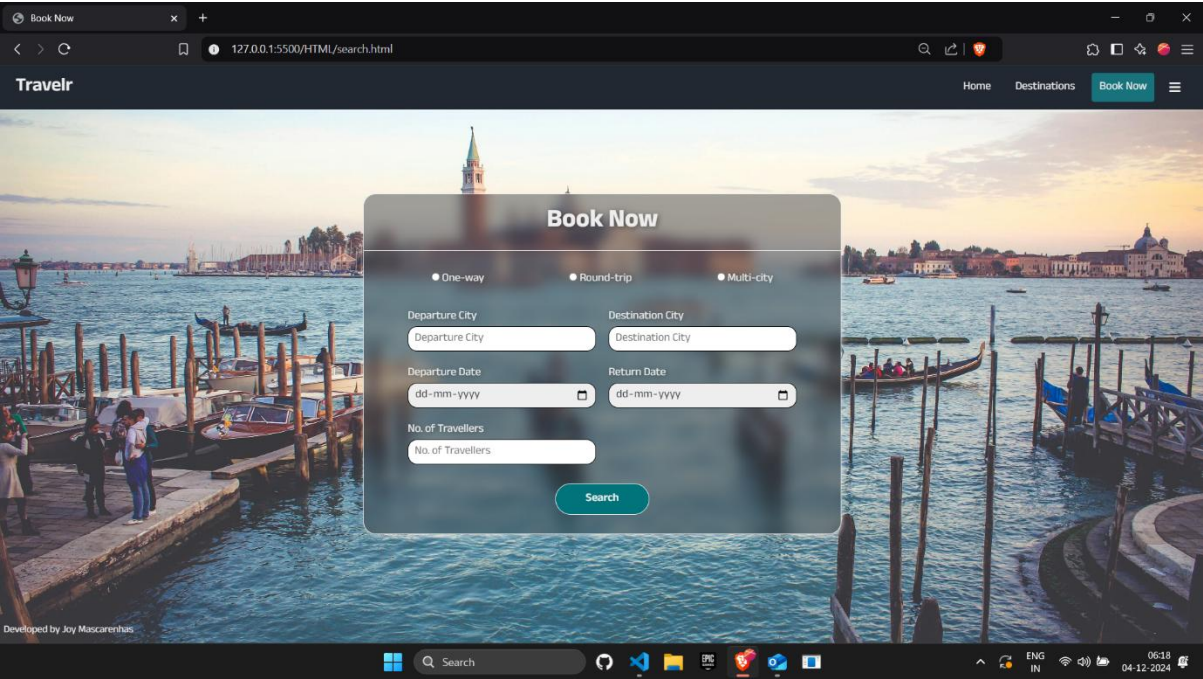

Landing Page:

Landing Page (Side Menu):

Search Page:

Search Page (Side Menu):

The screenshot displays a web browser window with the address bar showing `127.0.0.1:5500/HTML/search.html`. The page features a dark-themed header with the 'Travelr' logo and navigation links for 'Home', 'Destinations', and 'Book Now' (which is highlighted). A side menu on the right lists various services: 'Home', 'Destinations', 'Book Now' (highlighted), 'Deals & Offers', 'Contact Us', 'Flight Booking', 'Hotel Booking', 'Bus Booking', 'Vacation Packages', 'Reviews', and 'Help Center'. At the bottom of the side menu are 'Login' and 'Sign Up' buttons. The main content area has a background image of a harbor scene with a 'Book Now' modal form overlaid. The form includes three radio buttons for 'One-way', 'Round-trip' (selected), and 'Multi-city'. It contains input fields for 'Departure City', 'Destination City', 'Departure Date' (with a calendar icon), 'Return Date' (with a calendar icon), and 'No. of Travellers'. A 'Search' button is positioned at the bottom of the form. The browser's taskbar at the bottom shows the Windows logo, a search bar, and various application icons. The system tray on the right indicates the language is 'ENG IN', the time is '06:18', and the date is '04-12-2024'.
